

US FORECLOSURE LEADS
ASSET RECOVERY AGENT PROGRAM

Agent Troubleshooting Guide

Simple, step-by-step fixes for every common question — so you can spend less time stuck and more time closing cases.

Support: 9 AM - 5 PM Pacific, 7 days a week · usforeclosureleads.com

Welcome — you are not on your own.

This guide walks you through the fixes for the questions almost every new agent runs into. Each one is laid out step by step, in plain language, with nothing left out. Skim the Table of Contents, jump to your issue, and follow the numbered steps. If anything is still unclear, our support team is here **9 AM to 5 PM Pacific, 7 days a week** — just reply to any of our emails.

GOOD TO KNOW: You did not break anything. Almost every issue in this guide is a normal setup step or a one-click fix — not a mistake on your part. Take them one at a time.

Table of Contents

1. Logging In & Finishing Your Setup
2. Verifying Your Phone (Unlock Training)
3. Sending Claimant Emails (the New Way)
4. Adding a Phone or Email to a Lead
5. Running a DNC Check (Unlock Calling & Texting)
6. Setting Up Texting (TextBee)
7. Setting Up Ringless Voicemail (SlyBroadcast)
8. Recording Your Voice Sample
9. Calling Without Showing Your Personal Number
10. Training Videos Won't Play
11. Finding Your Email Templates
12. Tracking Old vs New Leads
13. Requesting More Leads
14. Certified Letters & Tracking
15. Getting Paid (W-9, 1099 & Payments)
16. Quick Reference & Getting Help

1

Logging In & Finishing Your Setup

■ I can't log in, or I'm not sure my setup is finished

Your account is created the moment your payment clears. Here is how to get in and finish the last steps.

- 1 Go to **usforeclosureleads.com** and click **Sign In** (top right).
- 2 Enter **the email you signed up with** and your password. Forgot it? Click **Forgot password** and follow the reset email.
- 3 Once inside, click **Getting Started** (or **Dashboard**) on the left menu and follow the short welcome steps.
- 4 Click **Next** through each step until it says you are finished. If you clicked something wrong earlier, don't worry — just run through it again; nothing is locked in.

HEADS-UP: Two logins, two jobs: your **dashboard login** (the email you signed up with) is where you work leads. Your **business email login** (yourname@usforeclosurerecovery.com) is only for reading replies from homeowners. They are separate.

2

Verifying Your Phone (Unlock Training)

■ The Closing Training videos are locked and my text code never arrives

The training unlocks after we confirm your phone number. Normally you get a 6-digit text code — but if it doesn't arrive, we can verify you manually.

- 1 Go to **Settings** in your dashboard and find **Phone Number**.
- 2 Type your cell number and click to send the code. Watch for a text with a **6-digit code**, then enter it and click **Verify & unlock training**.
- 3 If the code does not arrive after 2–3 minutes, use **Change number / resend** once.
- 4 Still nothing? **Reply to any of our emails** and tell us your number — we will verify it for you by hand, usually the same day, and your training unlocks immediately.

TIP: Some carriers block automated codes. That is not your fault and it does not affect anything else on your account — we just switch you on manually.

3

Sending Claimant Emails (the New Way)

■ My emails aren't sending — nothing shows in my Sent folder

This is the #1 question, and the good news is nothing is broken. We changed how first-touch homeowner emails go out.

- 1 First-touch claimant emails now send **straight from the dashboard** through our secure delivery service — **not** from your business email.
- 2 Because of that, these emails **will not appear in your business email Sent folder**. If you were checking there, that is why it looked like nothing sent — but it did.
- 3 To send one: on **My Leads**, click a homeowner's **email address** (or the Email button) on a lead. Your branded message opens, already filled in with their name, property, and surplus.
- 4 Review or edit it, then click **Send**.
- 5 The very first time, a pop-up appears titled "**New: send claimant emails right here.**" Click the blue "**Got it, send my email**" button (check the box so it stops showing).
- 6 You'll see a green confirmation and the lead gets an **Emailed** badge. Done.

GOOD TO KNOW: Replies from homeowners still come to your **business email inbox** as normal — so keep an eye there for responses, and reply to those directly.

4

Adding a Phone or Email to a Lead

■ I found a new phone or email for a claimant — how do I add it?

You can add contact info you research yourself onto any lead so outreach can use it.

- 1 On **My Leads**, click the lead to **expand** it.
- 2 Click **Add phone** (or **Add email**).
- 3 For a phone, enter **ONE 10-digit number, digits only** (example: 5551234567). Have more than one? Add them one at a time.
- 4 It saves to the lead right away. A new phone goes through a quick Do-Not-Call check first (see Section 5) before calling/texting unlock on it.
- 5 If you see **"Your account is still loading"**, the page hasn't finished loading your profile yet — wait a few seconds after the page loads and try again.

HEADS-UP: A brand-new number is saved instantly but stays locked for calling/texting until its DNC check clears. That is normal, not an error.

5

Running a DNC Check (Unlock Calling & Texting)

■ A phone number is locked — I can't call, text, or leave a voicemail

New numbers must pass a live Do-Not-Call check before outreach unlocks. You don't check anything by hand — it's one button.

- 1 Expand the lead on **My Leads**. A number that hasn't been checked shows a **"Run DNC check"** button (and a yellow clock icon).
- 2 Click **Run DNC check**. We check the number live against the Do-Not-Call registry — takes a few seconds.
- 3 If it comes back **clean** (green check), calling, texting, and voicemail drops **unlock automatically** on that number.
- 4 If it lands on the DNC list (red X), it stays locked — reach that person by **email or mail** instead.

GOOD TO KNOW: Green check = OK to contact. Red X = do not call/text (email or mail only). Yellow clock = not checked yet, click the button.

6

Setting Up Texting (TextBee)

■ I can't get texting (TextBee) working

TextBee sends your texts through an Android phone you connect once. Follow these exactly — the #1 mistake is downloading the wrong app.

- 1 On an **Android phone**, open a browser and go to **textbee.dev/download**. Install the app from there — **NOT** the Google Play version, which is a different app that will not work with us.
- 2 Tap through the "install unknown apps" / Play Protect "Install anyway" prompts, then grant the SMS and phone permissions it asks for.
- 3 Open the app and register a free account at **textbee.dev**. Register your phone as a device (scan the QR code from the dashboard, or paste your API key).
- 4 Copy your **API Key** and your **Device ID** from the TextBee dashboard (they are two different values).
- 5 In your agent dashboard, go to **Settings** → **SMS Gateway**, paste both in, and click **Save**.
- 6 Keep the phone **on, the app running, and online**. Turn **off battery optimization** for the app and allow background/autostart, or it will go offline.

TIP: Don't want to manage a phone? We can connect our shared texting gateway to your account for you — just ask support and we'll switch it on, no app needed on your end.

7

Setting Up Ringless Voicemail (SlyBroadcast)

■ Ringless voicemail drops aren't working

Voice drops go out through SlyBroadcast. You connect your SlyBroadcast account once in Settings.

- 1 If you don't have one yet, create a free account at **slybroadcast.com** first.
- 2 In your dashboard, go to **Settings** and find the **Ringless Voicemail (SlyBroadcast)** box.
- 3 Enter your **SlyBroadcast email/username** and **password**, then click **Save**.
- 4 Record your voice sample (Section 8) so the drops use your own voice.
- 5 Once connected, the **Voice Drop** button turns active on any lead whose number is DNC-cleared.

HEADS-UP: Voice drops only work on numbers that passed the DNC check and are not on the Do-Not-Call list — same rule as calling and texting.

8 Recording Your Voice Sample

■ How do I record my voice for the voicemail drops and avatar?

A 30-second sample lets the system use your real voice on voicemail drops and your AI avatar video.

- 1 Open the **My AI Avatar** (or **Ringless Drips**) tab in your dashboard.
- 2 Click **Record** and read the short sentences shown, out loud, in a quiet room.
- 3 Click **Save**. That becomes your voice for outreach.
- 4 If you also uploaded your 3 photos there, we build your AI avatar video and set up your agent page and claimant landing page automatically.

9 Calling Without Showing Your Personal Number

■ I want to call homeowners without my personal cell number showing

The simplest fix is a free second number app. You call through the app, so leads see that number, and callbacks come to it — your personal number stays private.

- 1 **Google Voice** (best pick) — go to **voice.google.com**. Free US number, and it can **forward calls to your cell**, so callbacks ring your normal phone while your personal number stays hidden. Needs a Google account and an existing number to verify; US only.
- 2 **TextNow** (textnow.com) — free number; calls ring inside the app (needs the app open + internet); ad-supported.
- 3 **TextFree** (textfree.us) — free number; app-based; free calling can be limited by ads.
- 4 Whichever you choose, only call numbers marked **DNC-cleared** in your dashboard — same rule no matter which line you dial from.

TIP: For the closest thing to using your normal phone, pick **Google Voice** and turn on call forwarding to your cell.

10

Training Videos Won't Play

■ A training video just spins or won't load

If a module video sticks on a loading circle, it's almost always your browser holding an old copy.

- 1 **Refresh the page** once (press F5, or Ctrl/Cmd + R).
- 2 If it still spins, **hard-refresh**: hold **Ctrl + Shift + R** (Windows) or **Cmd + Shift + R** (Mac) to clear the cached copy.
- 3 Try a different browser (Chrome works well) or an incognito/private window.
- 4 Check your internet connection — video needs a steady connection to stream.
- 5 Still stuck on one specific video? Reply to us with the module name and we'll check it right away.

11

Finding Your Email Templates

■ I can't find my Templates folder

You have templates in two places — and the folder name trips people up.

- 1 **Easiest — built into My Leads:** click a homeowner's **email** on a lead and a full branded message opens, already filled in. Click a **phone number** and a ready text appears. No folder needed.
- 2 **In your business webmail:** go to redbull.mxrouting.net/roundcube and log in with your business email (yourname@usforeclosurerecovery.com) and password.
- 3 Look at the **folder list on the left**. The folder is simply called **Templates** and sits **under your Inbox** — if there's a small arrow next to Inbox, click it to expand, then click **Templates**.
- 4 Open a message inside, copy the text, and paste it into a new email to fill in the claimant's details.

HEADS-UP: It's named **Templates** (under Inbox), not "Your Name's Templates" — that's the mix-up most agents hit.

12

Tracking Old vs New Leads

■ How do I keep track of which leads are old vs new?

The dashboard already records the date you received each lead, and you can sort by it.

- 1 On **My Leads**, use the **Sort** dropdown near the top of the list.
- 2 Pick **Issued: Newest First** to put your most recently received leads on top, or **Issued: Oldest First** for the oldest first. ("Issued" = the date the lead was given to you.)
- 3 To see the exact date on one lead, **click it to expand** — at the bottom you'll see **Assigned: [date & time]** (when it was issued to you) and **Scraped:** (when we first found it).
- 4 Use the **Show** filter to separate company-issued leads from your own imported ones, and filter by state or status so nothing gets lost.

13

Requesting More Leads

■ I've worked my leads — how do I get more?

You don't need to email us for your next batch.

- 1 On **My Leads**, tap the **Request Leads** button.
- 2 Choose how many and any state preference, then submit.
- 3 We send your next batch (up to **125 leads per week**), already skip-traced and ready to work.
- 4 Want more than your weekly allotment? You can buy extra leads at a small per-lead cost — issued within 24 hours of payment.

14 Certified Letters & Tracking

■ How do certified letters work, and where's my tracking?

We print and mail certified letters on your behalf, then send you the tracking.

- 1 On a lead, use the **Request Certified Letter** option. We print the package and prepare it to mail for you.
- 2 You'll get an email confirming it printed, and a separate email **within 24 hours with the USPS tracking number(s)** — each with a copy button and a direct USPS tracking link.
- 3 Tracking usually goes live within 24 hours, once USPS scans the first barcode.
- 4 Each account includes up to **5 certified letters per week** at no cost.

HEADS-UP: Certified letters are always mailed to the claimant's **current mailing address** — never the foreclosed property. If you only have the foreclosed address, add a current one to the lead first.

15 Getting Paid (W-9, 1099 & Payments)

■ How do I get set up to get paid, and how do payments work?

You work on contingency as a 1099 subcontractor — the homeowner pays nothing up front, and you're paid when they're paid.

- 1 In your dashboard's **Get Paid** section, download and complete the **W-9** and the **Direct Deposit / Independent Contractor** forms.
- 2 You can use **your existing business** — we issue your 1099 to your business name and EIN. No new company required.
- 3 Upload the signed forms back in that same section (there's a quick confirmation checkbox).
- 4 On the **3-payment (\$331) plan**, the three payments together make up your one-time program fee — not a subscription. Make all three to keep your dashboard and claim proceeds active.
- 5 Need your payment link for an installment? Reply to us and we'll send it right over.

16

Quick Reference & Getting Help

Sign in	usforeclosureleads.com → Sign In
Business webmail	redbull.mxrouting.net/roundcube
Send a claimant email	My Leads → click their email → Send
Add a phone/email	Expand lead → Add phone / Add email
Unlock a number	Expand lead → Run DNC check
Connect texting	Settings → SMS Gateway (TextBee)
Connect voicemail	Settings → SlyBroadcast
Record your voice	My AI Avatar / Ringless Drips tab
Sort old vs new leads	My Leads → Sort → Issued
Get more leads	My Leads → Request Leads (up to 125/wk)
Support hours	9 AM – 5 PM Pacific, 7 days a week
