

This guide covers everything you need to import your own leads into your dashboard: what to include, what is required, what we do for you after you upload, and the quickest way to a clean import. Use it with the Excel template we sent alongside it.

What information do we need?

Field	Required?	Notes
Owner Name	Required	Full name of the person foreclosed on (or First + Last in separate columns).
Property Address	Required	The foreclosed property street address.
State	Required	Full state or 2-letter abbreviation.
County	Recommended	Where the sale happened. Helps verify the surplus + skip trace.
City / Zip	Recommended	Strongly boosts the skip-trace hit rate. Include when you can.
Mailing / Current Address	Optional	Their current address if you have it (they moved out of the property).
Surplus Amount	Recommended	The excess/overage owed. Numbers only (e.g. 82450).
Phone 1-3	Optional	Leave blank and we skip trace them for you.
Email 1-3	Optional	Same -- optional; we skip trace.
Case Number	Optional	Court/case number if listed.
Notes	Optional	Anything useful for you on the lead.

Bare minimum for a valid import: Owner Name + Property Address + State. Everything else makes the lead stronger and the outreach better.

Common questions

Q: Do I have to include phone numbers and emails?

A: No. If you leave them blank, our system skip traces each lead to find the owner's current phone and email -- their number today, not one tied to the old foreclosed property. If your list already has them, include them and we keep them.

Q: What is the minimum I can get away with?

A: Owner Name, Property Address, and State. That is enough to import and skip trace. County, City, and Zip make it far more reliable.

Q: How do I actually upload it?

A: In your dashboard, open the Import Leads tab, upload your .xlsx or .csv, match the columns (the system auto-matches most), and confirm. Your leads land in My Leads as yours, and no other agent gets them.

Q: What happens after I import?

A: We skip trace any lead missing contact info, then DNC-scrub the phone numbers. Once DNC clears, the voicemail and text buttons unlock. Call and email are available right away.

Q: What kind of lead should I import?

A: Real foreclosure or tax-sale surplus leads where excess funds are owed to a former owner, ideally above \$5,000. Skip anything expired (past the claim window) or where the name is the buyer who purchased AFTER the sale -- match the name to the owner at the time of the foreclosure sale.

Q: Pre-foreclosure vs. foreclosure surplus -- does it matter?

A: Yes. When you upload, pick the lead type (Tax Deed, Pre-Foreclosure, Foreclosure Surplus, etc.). The email, text, and voicemail wording automatically adjusts to match -- e.g. 'upcoming sale' for pre-foreclosure vs. 'past sale' for a completed one.

Q: Why do City and Zip matter so much?

A: The skip-trace tool needs a complete address to match an owner to a phone. A street with no city or zip often returns nothing. Adding City + Zip can be the difference between a hit and a miss.

Q: Can you just trace a batch for me?

A: Yes. Send us the list (or upload it) and we will skip trace and DNC-scrub it for you before it goes out. You can also self-trace using the guides and the videos under Training Videos.
